PROFILE

Passionate and detail-oriented Computer Science undergraduate specializing in **cybersecurity**. Experienced Java developer with hands-on expertise in ethical hacking, network security, system hardening, secure application development, and cloud security. Enthusiastic about the DevSecOps lifecycle, cryptography (including post-quantum), and cloud technologies. Dedicated to **hunting cyber threats**, exposing vulnerabilities, and **defending against malicious hackers** while actively engaging in security awareness initiatives and live demonstrations.

EDUCATION

University of Kelaniya, BSc. (Hons) in Computer Science 2022 – Present

- **Specialization:** Cyber Security
- **CGPA:** 3.40/4.0

Taxila Central College - Horana, G.C.E A/L 2011 – 2019

- **Stream:** Physical Science Stream
- **Results:** 3Bs (Z-Score - 1.518)

Key Highlights

- Cisco-certified Ethical Hacker, Linux Essentials Certified, Comprehensive Master Java Developer Certified.
- Developed **SafeCyber**, a cybersecurity awareness platform with interactive security training.
- Implemented **Secure OpenStack Cloud Deployment** with IAM, network security, and hardening.
- Passionate about **cryptography research**, including homomorphic encryption & post-quantum cryptography.

PROJECTS

AI-Powered OSINT Reconnaissance Tool 2025 Feb - Mar

- Developed a web-based **OSINT** reconnaissance tool to automate intelligence gathering from public sources.
- Engineered a FastAPI-powered backend to collect, analyze, and visualize OSINT data for security risk assessments.
- Integrated data scraping, metadata extraction, and passive reconnaissance techniques to generate actionable insights.
- Designed an interactive dashboard for real-time threat intelligence visualization and risk reporting.
- Tech Stack: *FastAPI, Python, Web Scraping, OSINT, AI/ML (Planned), Data Visualization.*

Network Design & Simulation (Academic Project) 2024 Oct - Nov

- Designed and simulated a **scalable enterprise network** using **Cisco Packet Tracer**.
- Configured **routers, switches, VLANs, and subnets** to optimize network performance.
- Implemented **static and dynamic routing (RIP, OSPF)** for efficient data transmission.
- Applied **network security measures** including ACLs and firewall rules to enhance protection.
- Tech Stack: *Cisco Packet Tracer, Networking, Routing & Switching, VLANs, Subnetting, ACLs, Network Security.*

Automated Server Hardening with Ansible (Academic Project) 2024 Sep – Nov

- Developed Ansible playbooks to **automate security hardening** on RHEL-based servers using **CIS benchmarks**.
- Configured **firewall rules, SSH security, user access controls, and system auditing** to enhance security posture.
- Implemented **automated compliance checks** to ensure adherence to industry best practices.
- Reduced manual configuration efforts while improving **system resilience and security**.
- Tech Stack: *Ansible, RHEL, Linux Security, CIS Benchmarks, Automation, Firewall Management, System Hardening.*

Secure File Sharing System (Ongoing)

Feb 2025 – Present

- Developing a **secure and encrypted file-sharing platform** to ensure **confidentiality and data integrity**.
- Implementing **end-to-end encryption (E2EE)** for secure file transmission.
- Integrating **role-based access control (RBAC) and multi-factor authentication (MFA)** for enhanced security.
- Designing a **scalable system architecture** with secure cloud storage integration.
- Tech Stack: *Angular, NodeJS, AES Encryption, RBAC, Cloud Storage, Security Protocols*

Cybersecurity Awareness Platform

2024 Jan – Oct

- Designed and developed an interactive platform to educate users on cybersecurity threats through engaging content, quizzes, and real-world cyber incident simulations. Integrated user authentication, dynamic content delivery, and a secure backend to ensure data integrity and user privacy.
- Tech Stack: *ReactJS, Tailwind, NodeJS, ExpressJS, MongoDB*

CYBERSECURITY & SOC SKILLS

Threat Detection & Incident Response: Log analysis, security monitoring

Tools: Wireshark, Burpsuite

Network Security: IDS/IPS configuration, ACLs, VLAN security

System Security: Windows/Linux hardening, patch management, forensic analysis

Cryptography: Homomorphic Encryption, Post-Quantum Cryptography.

TECHNOLOGIES & TOOLS

Languages: C, Java, JavaScript, python

Networking: Network Configuration and Management (Cisco Packet Tracer)

DevOps & CI/CD: Git, Jenkins, Docker, Kubernetes

Technologies & Tools: Angular, ReactJS, Spring Boot, Node.js, ExpressJS

Databases: MySQL, MongoDB

Cloud: AWS, Azure

CERTIFICATIONS

Linux Essentials – Cisco Networking Academy

Oct 2024 – Dec 2025

Cisco Verified Ethical Hacker – Cisco Networking Academy

Jan 2025 – Present

Comprehensive Master Java Developer – Institute of Java Software Engineering

Mar 2022 - Jan 2023

EXTRACURRICULAR ACTIVITIES

YouTube Channel: Anjula Handapangoda

Content Creator of a beginner-level YouTube channel focused on teaching the Spring Boot framework and backend technologies. I aim to provide educational content on cybersecurity, programming, and various computer science concepts, sharing my learning journey to help others build a solid foundation.

Strong Communication & Public Speaking:

Hosted a cybersecurity awareness session at **TechXpo 2025**, engaging audiences on online safety.

Athletics & Teamwork:

Skilled in **high jump** and **volleyball**, demonstrating discipline, resilience, and teamwork.

Artistic Talents:

Passionate singer and portrait drawer(**PencilClone – FaceBook page**)

PROFESSIONAL MEMBERSHIPS

Member Training & Development Officer – University ISACA Student Group

Sep 2024 – Present

Member – University Free & Opensource Software Community

Sep 2023 – Present
